

The International Conference WWW/Internet 2006 was held in Murcia, Spain, 5-8 October, 2006.

This conference was organized by the International Association for Development of the Information Society (IADIS) and co-organized by Universidad de Murcia - Facultad de Comunicación y Documentación.

Co-organized by:

The intention of this Conference was to serve as an environment to draw together researchers, practitioners, students and anyone who worked or studied the field of WWW/Internet. The Conference covered both technological as well as non-technological issues related to developments of the context of WWW/Internet.

The submissions were accepted under the following fifty seven areas: Accessibility; Adaptive Web Systems; Collaboration; Computer-Mediated Communication; Data Mining; Database Planning and Development; Digital Economy; Digital Libraries and E-Publishing; Distributed and Parallel Applications; E-Business and E-Commerce; E-Government; E-Learning; Electronic Data Interchange; Quality, Evaluation and Assessment; Extensible Languages; Global Tendencies in WWW/Internet; Groupware; Human Computer Interaction; Hypermedia; Information Architectures; Information Visualization; Intelligent Agents; Interfaces; Internet & Customer Relationship Management; Internet Payment Systems; Internet Services; Languages; Metadata; Performance Issues; Personalized Web Sites and Services; Portal strategies; Protocols and Standards; Searching and Browsing; Security Issues; Semantic Web; Social & Legal Issues; Storage Issues; System Integration; Teaching and Learning Strategies; Technology Innovation and Competitiveness; Technology Management; Technology Strategies; Tele-Work; WWW/Internet Applications; WWW/Internet Case studies; WWW/Internet Impacts; Web Engineering; Web Personalization; Web Software; Wireless Applications; Ubiquitous Computing; Usability; User Modelling; Virtual Communities; Virtual Reality; XML.

The 2006 edition had 286 submissions from more than 29 countries. Each submission had been anonymously reviewed by at least two independent reviewers, to guarantee the final high standard of the accepted submissions. The final result was the approval of 71 full papers, which meant that the acceptance rate was below 25%. The other papers had been accepted as short papers and posters.

From the Conference were selected Best Papers to be published as extended versions in the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

The conference, besides the presentation of full papers, short papers, posters, and doctoral consortium presentations also included keynote presentations and a tutorial from internationally distinguished researchers: Professor Katia P. Sycara, School of Computer Science, Carnegie Mellon University, USA and Professor Fausto Giunchiglia, Head of the Department of Information and Communication Technology, University of Trento, Italy.
