With Fort Worth, Texas, USA, as the surroundings, we welcomed once again a successful edition of the International Conference on WWW/Internet 2013 (during 22 to 25 October, 2013).

The 2013 event was organized by the International Association for Development of the Information Society (IADIS) and co-organized by the University of North Texas (UNT).

Co-organize by:

UNT

UNIVERSITY OF NORTH TEXAS

The WWW/Internet conference tried to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have arisen. This conference aims to cover both technological as well as non-technological issues related to these developments. Its broad areas of interest were Web 2.0, Semantic Web and XML, Applications and Uses, Services, Architectures and Web Development and Research Issues.

This edition had 136 submissions from more than 23 countries. Each submission has been anonymously reviewed by an average of four independent reviewers, to ensure the final high standard of the accepted submissions. The final result was the approval of 33 full papers, which means that the acceptance rate was 24%. A few more papers have been accepted as short papers, reflection papers, poster/demonstrations and a doctoral consortium.

Extended versions of the best papers were selected to be published in:

❖ a special issue of the Journal of Web Engineering (JWE). ISSN: 1540-9589

❖ the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

Regarding the papers' presentations, the conference program was divided into 11 parallel papers sessions that included the presentation of full papers, reflection papers, short papers and posters. Besides the papers presentations this event also included two keynote presentations and a tutorial

Keynote Presentation:

"ERASURE-CODED DISTRIBUTED CLOUD STORAGE: MYTHS AND REALITIES"

by Dr. Yih-Farn Robin Chen, Researcher, AT&T Labs Research, USA

Keynote Presentation:

"THE PREDICTIVE POWER OF SEARCH TRENDS AND SOCIAL MEDIA "

by Professor Takis Metaxas, Wellesley College, USA
Conference Tutorial:

"SENTIC COMPUTING"

by Erik Cambria, Research Scientist at the National University of Singapore (Cognitive Science Programme, Temasek Laboratories) and Associate Researcher at the Massachusetts Institute of Technology (Synthetic Intelligence Project, Media Laboratory**).**

In general the Conference offered an opportunity to all their participants to discuss with success the most significant aspects regarding the theme Information Systems. It served as a forum that gathered researchers, practitioners, students and anyone that was working or studying in the field of the Information Systems.

The WWW/Internet Conference proceedings 2013 was published in Book (ISBN: 978-989-8533-16-6) by IADIS Press.
