With Porto, Portugal, as the scenery, we welcomed the 13th edition of the International Conference on WWW/Internet 2014 (during 25 to 27 October, 2014).

This conference was organized by the International Association for Development of the Information Society (IADIS).

Once again, the WWW/Internet conference tried to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have arisen. This conference aims to cover both technological as well as non-technological issues related to these developments. Its broad areas of interest were Web 2.0, Semantic Web and XML, Applications and Uses, Services, Architectures and Web Development and Research Issues.

The 13th edition had 136 submissions from more than 23 countries. Each submission had been anonymously reviewed by an average of four independent reviewers, to ensure the final high standard of the accepted submissions. The final result was the approval of 33 full papers, which meant that the acceptance rate was 24%. A few more papers have been accepted as short papers, reflection papers, poster/demonstrations and a doctoral consortium.

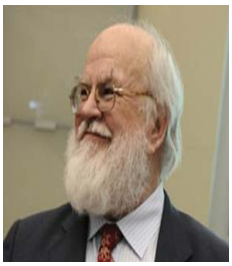
Extended versions of the best papers were selected to be published in the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

Regarding the papers' presentations, the conference program was divided into 11 parallel papers sessions that included the presentation of full papers, reflection papers, short papers and posters. Besides the papers presentations this event also included two keynote presentations from internationally distinguished Researchers:

Keynote Presentation:

"#NOEMAIL - WHY YOU COULD/SHOULD/MUST USE BETTER WAYS OF COMMUNICATING THAN EMAIL"

by Professor Paul Jones, Clinical Professor School of Media and Journalism & School of Information and Library Science University of North Carolina - Chapel Hill

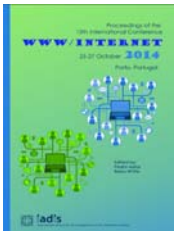


Keynote Presentation:

"WWW RESEARCH CHALLENGES FOR THE NEXT DECADE"

by Professor Bebo White,Stanford University, USA

Overall the Conference offered an opportunity to all their participants to discuss with success the most significant aspects regarding the theme Information Systems. It served as a forum that gathered researchers, practitioners, students and anyone that was working or studying in the field of the Information Systems.



The WWW/Internet Conference proceedings 2014 was published in Book (ISBN: 978-989-8533-24-1) by IADIS Press.
