

The 21st International Conference on WWW/Internet was held in Lisbon, Portugal, from 8 to 10 November 2022.

This conference was organized by the International Association for Development of the Information Society.

The WWW/Internet conference tried to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have arisen. This conference aims to cover both technological as well as non-technological issues related to these developments. Its broad areas of interest were Web 2.0, Semantic Web and XML, Applications and Uses, Services, Architectures and Web Development and Research Issues.

The 2022 edition was published jointly with the 19th International Conference on Applied Computing (AC 2022). 128 submissions from more than 28 countries. Each submission was anonymously reviewed by an average of four independent reviewers, to ensure the final high standard of the accepted submissions. The final result was the approval of 22 full papers, which means that the acceptance rate was 17%. A few more papers have been accepted as short and reflection papers.

Extended versions of the best papers were selected to be published

- ❖ the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

- ❖ the IADIS International Journal on Computer Science and Information Systems (IJCSIS). ISSN 1646-3692

Once again, the Conference offered an opportunity to all their participants to discuss with success the most significant aspects regarding the theme Information Systems. It served as a forum that gathered researchers, practitioners, students and anyone that was working or studying in the field of the Information Systems.

The WWW/Internet Conference proceedings 2022 was published in Book (ISBN 978-989-8704-44-3) by IADIS Press.
