

The 23<sup>rd</sup> International Conference on WWW/Internet was held in Zagreb, Croatia, from 26 to 28 October 2024.

This conference was organized by the International Association for Development of the Information Society.

The WWW/Internet conference tried to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have arisen. This conference aims to cover both technological as well as non-technological issues related to these developments. Its broad areas of interest were Web 2.0, Semantic Web and XML, Applications and Uses, Services, Architectures and Web Development, Research Issues and Emergent Areas.

The 2024 edition was published jointly with the 21<sup>st</sup> International Conference on Applied Computing (AC 2024) and received 226 submissions from more than 27 countries. Each submission was anonymously reviewed by an average of four independent reviewers, to ensure the final high standard of the accepted submissions. The final result was the approval of 40 full papers, which means that the acceptance rate was 18%. A few more papers have been accepted in the following categories: short papers and posters.

Extended versions of the best papers were selected to be published:

- ❖ the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

- ❖ the IADIS International Journal on Computer Science and Information Systems (IJCSIS). ISSN 1646-3692

Besides the papers' presentations, the conferences also feature one keynote presentation by Prof. Dr. Claudia Loebbecke (Dept. of Media and Technology Management, University of Cologne, Germany), for being the keynote speaker.

#### Keynote Presentation:

**“DATA ANALYTICS AND ARTIFICIAL INTELLIGENCE IN BUSINESS, SOCIETY, AND ACADEMIA: OPPORTUNITIES AND RISKS BEYOND THE TECHNOLOGICAL HYPE”**

by Prof. Dr. Claudia Loebbecke, Dept. of Media and Technology Management, University of Cologne, Germany

Once again, the Conference offered an opportunity to all their participants to discuss with success the most significant aspects regarding the theme WWW/Internet. It served as a forum that gathered researchers, practitioners, students and anyone that was working or studying in the field of the WWW/Internet and related themes.

The WWW/Internet Conference 2024 proceedings was published in Book (ISBN: 978-989-8704-62-7) by IADIS Press.
