The 16th International Conference on WWW/Internet was hosted in Vilamoura, Algarve, Portugal (during 18 to 20 October, 2017).

This conference was organized by the International Association for Development of the Information Society.

The WWW/Internet conference tried to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have arisen. This conference aims to cover both technological as well as non-technological issues related to these developments. Its broad areas of interest were Web 2.0, Semantic Web and XML, Applications and Uses, Services, Architectures and Web Development and Research Issues.

The 2017 edition was published jointly with the 14th International Conference on Applied Computing. These events received 167 submissions from more than 22 countries. Each submission had been anonymously reviewed by an average of four independent reviewers, to ensure the final high standard of the accepted submissions. The final result was the approval of 28 full papers, which means that the acceptance rate was 17%. A few more papers have been accepted as short and reflection papers, posters/demonstrations and a tutorial.

Extended versions of the best papers were selected to be published:

- the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

Besides the presentation of papers, the 2017 event also included one keynote presentation presented by Professor Paulo Ferreira, Department of Computer Science and Engineering, IST – Técnico Lisboa, Portugal, one invited talk given by Dr. Latif Ladid, Founder & President of the IPv6 Forum, Luxembourg and tutorial by Hermann Kaindl, TU Wien, Vienna, Austria.
Keynote Presentation:
“MAKING THE FUTURE A BETTER PLACE TO LIVE IN”
by Professor Paulo Ferreira, Department of Computer Science and Engineering, IST – Técnico Lisboa, Portugal

Invited Talk:
“IPV6-BASED NEW INTERNET”
by Dr. Latif Ladid, Founder & President of the IPv6 Forum

Tutorial:
“INTERACTION DESIGN FOR AUTOMATED GENERATION OF WEB USER INTERFACES”
by Hermann Kaindl, TU Wien, Vienna, Austria

Once again the Conference offered an opportunity to all their participants to discuss with success the most significant aspects regarding the theme Information Systems. It served as a forum that gathered researchers, practitioners, students and anyone that was working or studying in the field of the Information Systems.
